MAXIMUM HEIGHT

1650 m.a.s.l.

SEASON

ALL YEAR

## ITINERARY

6:00 am The activity begins in Puerto Natales. Passengers will be collected by private transportation 4x4 at their hotel to be taken to the start site of the adventure located on the slope that can be seen from the East Cord Chacabuco.

Beautiful tour where we must pass a series of lands through a path at the beginning and then reading field.

The trail starts through beautiful mature and renewal Notofagus forests where we'll always have streams with fresh water to supply us.

Later it begins the ascent with moraines and/or snow depending on weather conditions

The path is not easy. In total, it runs through 9 kms, of which most are on the rise, but the effort is worthwhile for an unsurpassed view of the Porteño and Bull Lakes through all the way. And of course, the imposing Paine Massif from the top.

Box lunch along the route

Passengers will be taken by private transportation back to their hotels in Puerto Natales around 17:00 hrs

## IT INCLUDED

- Certified guide throughout the entire program with extensive knowledge of the area and mountaineering
- Private transportation 4x4
- Box lunch and snacks
